Having to choose between five different versions (yes, Vista comes in FIVE flavors!) can be confusing! Don't sweat it, though--we've got you covered. We show you how to decide which flavor of Vista is best suited to you! Then we walk you through installing and setting up Vista for

the very first time. Next we dig into the new Vista interface, which is quite a change from the old XP! Then we give you a tour of the many new and enhanced features. While you might fancy yourself a wicked-smart Windows user, dont skip this section! Were positive youll find things you didnt know that will help you make Vista do thy bidding. Dont like the slick new Vista interface? (Macintosh, anyone?) We show you how to harness the power of Vista while keeping the look and feel of your XP. Who says change has to be painful? After you have the basics nailed, we then show you some of the cool things you can do with Vista, from customizing its performance, to disabling annoying security controls, to connecting to a wireless network.
