

# Alices Adventures in Wonderland: An Edition Printed in the Nyctographic Square Alphabet Devised by Lewis Carroll

Charles Lutwidge Dodgson, a.k.a Lewis Carroll, invented a special writing instrument he called the Nyctograph on 24 September 1891, in frustration at the process of getting out of bed at 2 a.m. in a winter night, lighting a candle, and recording some happy thought which would probably be otherwise forgotten. This edition of Alices Adventures in Wonderland is written entirely in the authors unique night-time alphabet.
