

Amazing Math Magic

Numbers, cards, coins, and shapes: with these, and a few mathematical principles, you'll turn into a magician! Just gather a few very ordinary, easy-to-find items (paper, pens, a calculator, dice, pennies, scissors), practice your patter a little, step in front of an audience--friends, family, maybe even your teachers at school--and prepare to astound them. Guess the number someone will choose; try some math telepathy; make mobius strips out of paper; and move from one end to another--a routine that uses a stack of cards for a very unique effect. Do an incomplete prediction, a trick that seems as if its going wrong...until you produce a surprise ending. Every one is easy to master--but no one else has to know that!

Mathematical Magic Trick - The secret is based on the Kruskal count, which isn't the name of a magic-wielding vampire, but of a mathematical parlor trick discovered by **Stunning Friends With Math Magic - Cut the Knot** Magic squares are old mathematical puzzles that you can use to create this magic.
