

# The Maintenance Book: A Systematic Approach to the Physical Attributes of Trumpet Performance

Dr. Michael Brown, chairman of the Music Department at Mississippi State University, is an accomplished trumpeter and studied pedagogue. His method consists of a series of systematic exercises that develop the physical aspects of tone, flexibility, range, and technical velocity required for proficient trumpet playing. For the professional, The Maintenance Book provides exercises to maintain a high level of physical endurance and strength for the variety of trumpet literature and performance venues. For the student, it provides a method for developing those same physical skills over an extended period of time.
