

Cha Ching: A comprehensive guide to winning in the sports book

Cha Ching, is a comprehensive guide to winning in the sports book. If you are one of the millions of people that gamble casually losing much more than you win, or one of those knowledgeable players that just cant win often enough to break even, then CHA-CHING is the book for you. The methods and techniques utilized in this book can help you win more consistently then you ever have. The key to winning at anything lies in a few simple yet effective methods that I am offering to you in my book. Once you have read CHA-CHING you will, for the first time, gain a level of confidence, control and consistency that will allow you to make money gambling on sporting events when most others are losing. We can all use a few extra dollars for bills, a new car or even a vacation. Let Cha-Ching make a difference on your next trip to Vegas. In discussing my book to friends and family, colleagues and gamblers, I seem to get the following five questions asked more than anything else.

Q: Why is Cha-Ching better than other gambling books on the market? A:

Cha-Ching lays out the simplest most effective way to win, providing information the gambling establishment doesnt want you to know. I present the information in a simple easy to understand manner, allowing readers of every skill level to comprehend the text. You dont have to have any gambling knowledge to read this book and begin winning at the sports book. Q: How do I know the system you are teaching will work?

A: Chi-Ching was a living and growing book; meaning, I didnt initially start out to write this book, I started out to see if there was a way to win consistently. From that initial experiment along with several trials and failures, came this book. Once I had a system I was comfortable with I began writing the book while conducting my experiment designed to verify the system I had created. In that

experiment, the system winning percentage was even higher than 80%. However, I have since made additional changes to the system making it even safer than the experiment I conducted for this book.

Q: How much money can a person make using the system in this book? A:

In the experiment, which I conducted for purposes of this book, I won more than 80% of the time. I believe on average you will win 70 to 80% of the time. Q:

If your system is as effective as you say, how come nobody came up with it before you? A: I DONT KNOW!!!

The fact is, most people bet on the same types of teams in the same types of categories. I just took what most of the betting public does (in a sense) and added rules and procedures to it, which allows for less chance and more precision. It is the rules and the self-disciplining level of the person betting that will ultimately determine how much he or she wins or loses. Q:

Can you prove your system works? A:

Yes, the book should be proof enough, however! I am always willing to accept a challenge from anyone at anytime. I truly believe in this system and will back up any time, any place. Bottom Line:

If you had invested \$1,000.00 in the stock market in 1995 (based on average growth), you would have \$2,000.00 today, that is an average of 10% annually over ten (10) years. That is a very good return on your initial investment and no credible financial institution would tell you otherwise. In comparison, if you would have taken that same \$1,000.00 and invested it at the sports book using the system you will learn in this book (making only one bet each month) you would have \$21,750.00 today, thats an average of better than 200.00% per year, and that is incredible by anyones standards.

That is based on winning 75% of the time as the median; in reality your winning percentage may be higher. As a matter of fact, I would go so far as to say there is no investment you could make as safe that offers a rate of return within 100 points of this.
