

Natural Gas Agreements

This high level practitioner text provides a comprehensive guide to negotiating the complete range of natural gas agreements, from the supply and storage stage all the way through to specialised sales contracts. With many topical examples drawn from practice, it steers the reader through the complexities of each contractual process. * In-depth practitioner work, written by an expert team of specialists in this field * Each chapter deals with a separate stage of the gas production process * Truly international coverage not limited to a particular jurisdiction
