

Daily exercises (for tuba)

Dynamic flexibility

Remember to start all notes piano and don't play louder than forte. Be accurate about the tempo. When playing a fast crescendo there is always a risk of pressing the lips to hard against the mouthpiece. This can cause the pitch to raise or damage the tone quality. Compensate for this by allowing the instrument to move away from you as you play the crescendo.

- 3 -

Daily exercises for tuba players. All exercises are followed by an explaining text. From the content: - development of the breathing - Dynamic flexibility (use everything from pianissimo to fortissimo when practising) - Develop the vibrations of the lip - Legato practising - Scales - For the high register
