

Evidence-Based Psychotherapy Treatment Planning for Panic Disorder DVD, Workbook, and Facilitators Guide Set (Evidence-Based Psychotherapy Treatment Planning Video Series)

This DVD addresses the challenges many practitioners face in assimilating results from psychotherapy research into their treatment plans. Evidence-Based Treatment Planning for Panic Disorder DVD discusses panic disorder and its diagnosis; the steps involved in psychotherapy treatment planning, empirically supported treatments for panic disorder, and how to integrate objectives and intervention consistent with those treatments into a treatment plan. Role-play scenarios illustrate selected aspects of the empirically supported treatments, including cognitive and behavioral coping skills, cognitive restructuring, physical sensation exposure, and situational exposure. A corresponding workbook can be used in conjunction with the DVD as a self-paced or collaborative learning tool.
