

## Ghost Cities of China (Asian Arguments)

Featuring everything from sports stadiums to shopping malls, hundreds of new cities in China stand empty, with hundreds more set to be built by 2030. Between now and then, the countrys urban population will leap to over one billion, as the central government kicks its urbanization initiative into overdrive. In the process, traditional social structures are being torn apart, and a rootless, semi-displaced, consumption orientated culture rapidly taking their place. Ghost Cities of China is an enthralling dialogue-driven, on-location search for an understanding of Chinas new cities and the reasons why many currently stand empty.
