

Goodbye, Gasoline: The Science of Fuel Cells (Headline Science)

A fuel cell is a device that converts chemicals into electricity without pollution. This clean energy can be used to power cars, homes, and businesses anything that uses electricity. A fuel cell is similar to a battery, but fuel cells don't go dead they just need to be refilled. Fuel cells may be the future of energy, providing a clean alternative to burning fossil fuels. There is still work to be done before fuel cells will be practical for everyday use, but many scientists are working to produce safe, cost-effective fuel cells to power our world.

Goodbye, Gasoline: The Science of Fuel Cells (Headline Science Compass Point Books, - Headline science. 48 pages, 2009, English, Book Illustrated, 6. Goodbye, gasoline : the science of fuel cells / by Kristi Lew, [Matching **9780756535278 - Goodbye, Gasoline: the Science of Fuel Cells** Buy Goodbye, Gasoline Science of Fuel Cells [Headline Science] by Lew, Kristi [Compass Point Books, 2008] [Library Binding] on ? **FREE Nature interrupted : the science of environmental chain reactions** Goodbye, Gasoline: The Science of Fuel Cells Lew, Kristi AR Quiz No. 124223 EN This book explores the future of fuel cell energy, explaining how these **Goodbye Gasoline: The Science of Fuel Cells (Headline Science)** by Hossain, Farhana Illustrator.
