

The Muslim Brotherhood and the Freedom of Religion or Belief: Regime/Islamist interaction in Egypt

Islamist movements like the Egyptian Muslim Brotherhood are increasingly embracing democratic principles. Therefore, an exploration of their comprehension and support of the underlying values of democracy is crucial, in order to understand what democracy actually means to these actors. However, Islamists do not operate in a political vacuum. In the Egyptian context, one must consider the effects of long-term authoritarian rule, in addition to the Egyptian regimes political reliance on, and manipulation of, conservative Islam. This reliance renders the Egyptian regime unable to reject the critique against it regarding Islam and demands of increased protection of Islamic values. The result has been the creation of an illiberal religious discourse which functions as the Brotherhoods main, if not only, channel of influence. As the organizations democratic efforts do not achieve any tangible results, the illiberal traits are strengthened.

Thinking About Tradition, Religion, and Politics in Egypt Today Islam in Egypt is the dominant religion with around an estimated 85% of the population. Almost .
