

Leonard Freed: Worldview

Leonard Freed ranks among the giants of twentieth-century photojournalism. His work as a member of Magnum regularly graced the front pages of major newspapers around the world, as well as the covers of many international magazines. *Worldview*, the most ambitious collection of Freed's work ever produced, spans his full 50-year career, from coverage of the Israeli-Palestinian conflict back through the American Civil Rights movement to post-war German reconstruction. Among other highlights, it includes a key selection of images from his New York City Police Department project that became the landmark book, *Police Work*. There, as throughout his career, Freed's vision was sharp, insightful and critical, but always deeply sympathetic to his fellow human beings--he was a pioneer in what has aptly been called concerned photography. He died in 2006.
