

Macroeconomics and the Financial System (Loose Leaf) (Budget Books)

Watch this video interview with Greg Mankiw and Larry Ball discussing the future of the intermediate macroeconomics course and their new text. The financial crisis and subsequent economic downturn of 2008 and 2009 was a dramatic reminder of what economists have long understood: developments in the overall economy and developments in the financial system are inextricably intertwined. Derived and updated from two widely acclaimed textbooks (Greg Mankiw's *Macroeconomics*, Seventh Edition and Larry Ball's *Money, Banking, and the Financial System*), this groundbreaking text is the first and only intermediate macroeconomics text that provides substantial coverage of the financial system.
