

Omega Place

Paul Hendry just wants to get away from his mother and annoying step-father. But when he runs away, he finds that life on the streets is nothing like what he expected. By chance, he falls in with a radical action group called Omega Place, whose members are determined to let people know exactly how closely the government is watching them on closed-circuit TV cameras posted in public places. What are the ramifications of this kind of footage? Paul is about to find out. Graham Marks has written a spine-tingling thriller about the menacing possibilities of technology that aren't just around the corner, they are here already.
