Photography DSLR Photography Made Easy - The Ultimate Beginners Guide To Taking Amazing Pictures! DSLR basically stands for Computerized Single Lens Reflex. If we talk about in very simple language then, DSLR is an advanced camera that uses mirrors to direct light from the lens to the viewfinder. If you do not know what a viewfinder is then you should know that it is a gap on the back of the camera that is basically used to see that thing of which anyone is going to take the snap. So, if you are keen to take pictures by using your DSLR then you should know some of the very basic skills to become expert later on. Here is a preview of what you'll learn: An introduction to photography using DSLR How to take pictures in various modes using DSLR Editing the pictures using the edit option Steps for taking high quality pictures
