

Photographing Architecture and Interiors

Julius Shulmans long career photographing great architectural works with depth, passion, drama, and an instinct for the architects intentions has ensured his present status as one of the worlds preeminent architectural photographers. His eloquent photos interpreting the structures of Richard Neutra and other early modernists helped the viewing public to understand these revolutionary buildings, and brought prominence to modernist practitioners who might otherwise have been considered eccentric. Frank Lloyd Wright once said that no better photos had ever been taken of Taliesin West than those by Shulman. Photographing Architecture and Interiors, published in 1962, is Shulmans first book, and he still considers it to be his most genuine reflection on the profession and on his own artistic philosophy. This title is an exact reprint of that now-classic publication. All of Shulmans famous photographs have here been reproduced from original prints, giving the images a crispness and luminosity not seen even in the 1962 edition. The introduction by Richard Neutra, perhaps Shulmans most important client and avid supporter, has been preserved; also included is a new foreword by Shulman himself.
