

Dragons: More than a Myth

Four teenage boys are dragged to their deaths by a reptilian monster that emerges from a fog-bound sea off the coast of Florida. In the north-east of England, a shadowy cult is rumoured to have sacrificed human victims to a dragon-god well into the 20th century. In New Guinea, giant lizards with huge teeth and claws kill dozens of villagers and send the natives into a panic. In the Gambia, an enraged dragon smashes a bridge, tipping people to their doom. These all sound like the scripts for horror films or novels, but they are all alleged to have actually happened - and furthermore, well within living memory. From our earliest childhood, we are taught that dragons are imaginary beasts; the stuff of myths and legends, yet these most ancient of monsters are still being reported from all corners of the globe in this, the age of reason. Could the dragon legends have a basis in fact? Richard Freeman, cryptozoologist, author, explorer, adventurer, and Zoological Director of the worlds largest mystery animal research organisation, follows this uber-monster right across the globe, from prehistory to the present day. He tracks it from the steamy jungles of the Congo, to the desolate lakes of eastern Siberia. The dragon rears its scaly head in every culture on Earth; from the Indians to the Australian Aborigines, and from the Vikings to the Pygmies. The inescapable conclusion is that there are very real beasts at the core of these fantastic stories. The dragon has its teeth and claws deep into the collective psyche of mankind, and its not about to let go. Our most ancient fear still stalks the earth today. Beware. This is no fairytale! When your parents told you that there were no such things as dragons, they lied!

Dragon Queen - Google Books Result The dragon has long been the symbol of empirical greatness in China and represents a divine creature with the ultimate goodness, prosperity **Dragons: More than a myth?: : Richard Freeman**

The Lernaean Hydra or Hydra of Lerna more often known simply as the Hydra, was a In the canonical Hydra myth, the monster is killed by Heracles, more often known associated in Babylonian contexts with Marduks dragon, the Mushhushshu.
