

Music Thief

Billy Elliot meets High Fidelity in the debut novel from Matt M. Baldwin - Music Thief. Drama and humour blend with issues of family, friendship and modern music to deliver a gritty, uplifting modern tale about finding your place in the world - even when everyone is telling you that place is completely wrong for you. 17 year old high school dropout Stevie Love used to think his biggest problem was his Mom's obsession with a dead 70s Rock star. Then he discovered the drawer full of unpaid bills in the family store. With financial ruin just around the corner and his mother intent on ignoring it, Stevie realises it's up to him to find the money they owe - and fast. Moneymaking opportunities in rust belt 80s Indianapolis however are as rare as Billy Ray Cyrus hit songs. To find the cash, Stevie's going to have to attempt things he never dreamed of. But surely winning the state's music competition can't be one of them? Not with no band, no stage presence and as his mother has told him all of his life, absolutely no musical talent. However as the competition draws closer, a difficult friendship with a deaf mute Jamaican with a passion for vinyl records offers a possibility. But only if he can uncover the musical ability he never had, and do it without his mother ever finding out. Because if she ever did, Stevie knows it would tear their family apart forever.
