

Replacing Mars

This story follows the journey of twin boys, Owen and Ted. Owen has one of the highest IQs in the world...his brother Ted - not so much. Ted is still working the same job at the fast food joint that he can't seem to break out of. Meanwhile, Owen is dazzling the world with his intellect. Their paths merge together when one night, an alien makes first contact with them. He's from the planet Terreni, and he comes seeking their help in moving his planet into our solar system. The boys travel to their planet, meeting other aliens and learning more about Terreni and why they need to move it. The twins' job is to return to Earth to, ultimately, convince the United Nations to allow Terreni to replace Mars in its orbit. The uncertainty of all of this creates massive panic on Earth, putting the boys' lives in jeopardy. Will they be able to help the Terrenians, and should they even trust them in the first place?
