

Geothemes: Pt. 2

Featuring thematic case studies which use contemporary examples from around the world, this is the second of three books which aim to provide a coherent approach to both skills and content of National Curriculum geography at Key Stage 3. Each book is divided into three sections, dealing with physical, human and environmental themes, respectively. The approach is enquiry-based and supported by over 30 different types of activity in each book. End-of-unit summaries reinforce key points, and IT opportunities are highlighted throughout.
