

Edge Space: Memoir of a Teenage Starfighter Pilot

A fleet of humanoids from beyond known space came in blasting, but Earth is fighting back. Young ace pilot Deckham Bannison is the tip of the spear, and he knows humanity is depending on him. Flying heavily-armed starships into combat with his wingmen all around him, he takes the fight to the enemy and looks good while doing it. But there's something else going on behind the scenes, and Earth's strategists aren't telling the young pilots everything they need to know. Deckham starts investigating in between missions to uncover the hidden forces that are keeping humanity at war with their mysterious enemy. What he ultimately discovers will blow his mind and yours. Edge Space is YA science fiction with a hard twist. This fast-paced novel strikes an enjoyable balance between action and technology, ideas and emotions. In the end, it brings us face to face with the reality of combat in any age and who we can become when we go to war.
